

Jithin Roy W C

+91-8714514587 | wc.jithin@gmail.com | Trivandrum, India

PROFESSIONAL SUMMARY:

A Cyber Security Engineer with over 4+ years of experience and expertise in protecting organizations from cyber threats. Proficient in conducting risk assessments, identifying vulnerabilities, and performing Vulnerability Assessment and Penetration Testing (VAPT) while ensuring compliance with security standards. Dedicated to staying ahead of evolving threats to maintain the highest level of information security.

EDUCATION:

Master of Technology in Power Electronics and Drives (M.Tech)
Karunya University, Coimbatore, India.

CERTIFICATIONS & OTHER TRAININGS

- Certified Ethical Hacker v12 (CEH)
- Certified Penetration Tester (CPT) - Red team Hacker Academy
- Certificate in Penetration Testing - Hacktify Cyber Security Academy
- Certificate in Web Application Hacking - Udemy
- Certificate in Network Penetration Testing - Udemy
- Certificate in Penetration Testing - Try hack me Platform
- Certificate in Mobile Application Penetration - TCM security Academy
- Certificate in Android Application Security - Mobile Hacking Lab

TECHNICAL SKILLS:

- Web Application VAPT
- API VAPT
- Network VAPT
- Mobile Application VAPT
- Thick Client VAPT
- Vulnerability Management
- OS hardening
- Firewall Configuration Review

WORK EXPERIENCE:

Information Security Analyst

UST, Trivandrum, India - Dec 2024 - Present

- Performed end-to-end vulnerability assessments and penetration tests on web, mobile, network, and API environments to identify and mitigate security risks.
- Executed testing for common OWASP Top 10 and critical vulnerabilities using industry-standard tools (Burp Suite, Kali Linux, Nmap, Metasploit, MobSF, etc.).
- Delivered clear, actionable reports with risk ratings and remediation guidance to technical and non-technical stakeholders.
- Collaborated with developers and IT teams to validate issues, improve security controls, and verify remediation effectiveness.

Cyber Security Engineer

15 July 2022 to 31 October 2024 - CYBER PWN-Bangalore, India

- **Comprehensive Vulnerability Assessments:** Conducted thorough assessments across various platforms and environments, identifying and prioritizing security weaknesses to enhance overall security posture
- **Penetration Testing Expertise:** Executed penetration tests on web applications, networks, APIs, mobile applications, and thick client applications, utilizing a range of tools to simulate real-world attacks and assess system resilience.
- **Detailed Reporting:** Developed comprehensive reports summarizing findings, vulnerabilities, and risk levels, providing actionable remediation recommendations to stakeholders and technical teams.
- **Vulnerability Testing:** Conducted testing on various vulnerabilities, including SQL Injection (SQLi), Cross-Site Scripting (XSS), Cross-Site Request Forgery (CSRF), Broken Authentication and Session Management, Insecure Direct Object References (IDOR), Security Misconfiguration, Sensitive Data Exposure, Broken Access Control, XML External Entities (XXE), Server-Side Request Forgery (SSRF), File Upload Vulnerabilities, Unvalidated Redirects and Forwards, Clickjacking, Insufficient Logging and Monitoring, Remote Code Execution (RCE), Directory Traversal, Weak Password Policies, Improper Input Validation, Insecure Deserialization, and Missing Security Headers.
- **Network Penetration Testing:** Performed network penetration testing using tools including Nmap, Wireshark, Metasploit, Nessus, OpenVAS, Burp Suite, Aircrack-ng, Ettercap, Kali Linux (with built-in tools), and Tcpdump.
- **API Penetration Testing:** Conducted API penetration testing primarily using Postman, Burp Suite, and Swagger.
- **Mobile Penetration Testing:** Tested for common vulnerabilities in mobile applications, including Insecure Data Storage, Insecure Communication, Improper SSL Certificate Validation, Insecure WebView, Code Injection, SQL Injection, Insecure APIs, Broken Authentication, and more, utilizing tools such as MobSF, JADX, Frida, and simulators like Genymotion, Nox Player, and Android Studio.
- **Routine Vulnerability Scans:** Performed routine vulnerability scans against specified systems, analyzing results and collaborating with business units to remediate identified issues.
- **Application Penetration Testing:** Conducted application penetration testing for various business applications, familiar with Grey and Black box testing approaches.
- **Technical Communication:** Effectively communicated technical vulnerabilities and remediation steps to developers and management, fostering collaboration for vulnerability mitigation.
- **Kali Linux Proficiency:** Extensive experience using Kali Linux for penetration testing and security assessments.
- **Collaboration with Development Teams:** Worked closely with application developers and IT staff to validate vulnerabilities, understand root causes, and implement effective security measures.
